# Engineering For Kids Minecraft Class Information and Permission Form

Hello Parents,

Thank you for signing your child for an Engineering For Kids class that uses Minecraft! We are excited to have them! However, before your child can participate in our class there are some things, we need you to know about the class and there is some information we need from you.

You probably already know that this class will be taking place in the game Minecraft. What you might not know is that this class is taught in a shared Minecraft world that all of the students and teachers are in, so they can build and create together! It is also worth noting that none of the computers in this class will be connected to the Internet and that no one other than the students and the teachers will be able to participate. This class uses the PC version of Minecraft and will require that you/your child have a license for the PC version of Minecraft. If you or your child already has a Minecraft license, they will be able to use that, but if they don't have access to a Minecraft license, one will need to be purchased. Minecraft licenses are associated with an email address and a password that are used to log in to Minecraft when beginning to play. Supplying the email address and password associated with your child's Minecraft license below will ensure they have their information on the day of class and will be able to participate:

Student Name:_____

Parent Name:_____

Minecraft Account Email Address:_____

Minecraft Account Password:_____

To purchase a Minecraft License:

Make or choose an email address to use and go to minecraft.net. Click the large button labeled *Buy Minecraft*. Enter the appropriate information on the next several pages, making note of the entered Email Address and Password for the Minecraft Account. A Minecraft license cost CAD 35. This cost is in addition to the cost of the class.

If you need to purchase a Minecraft license for this class, it will continue to be yours during and after the class and you can continue to use it to play Minecraft on your home computer. We, at Engineering for Kids, promise we will not do anything with the Email Address and Password you supply other than store it as a reference for the period of the class to ensure you child is able to participate. Once the class is completed, we will delete our records of your account information to ensure your privacy.
